

Wastewater Utility Green Power Report

June 2010

Electricity Generated in June: **41,636.7 kWh (kilowatt hours)**

This amount of electricity would have cost \$2,914.57 if it had been purchased from Duke Energy.

Producing this electricity on-site prevented the emission of approximately 41.5 tons of carbon dioxide.

This amount of carbon emissions is about that of 7 average cars for a **year**.

Over **20,000 gallons of grease** were processed in our digesters for the month.

2010 Year to Date Total: 366 Megawatt hours

(15% of our plant's power)

The City of West Lafayette's Wastewater Utility has pledged to generate at least 6% of its electricity on-site as Indiana's first wastewater plant to become an EPA Green Power Partner.
